Helen Thorpe, wife of Mayor John Hickenlooper, welcomed an estimated crowd of nearly 2,000 people to the third annual Founders’ Day Celebration in the East 29th Avenue Town Center at Stapleton. Known for her support of public education, Ms. Thorpe applauded having all the proceeds from concessions at the celebration benefit schools in the Stapleton area. Forest City Stapleton, Inc. is working with The Stapleton Foundation and Denver Public Schools to involve parents in fundraising opportunities at Stapleton in support of their children’s schools. Cloudy skies provided pleasant temperatures as residents from Stapleton and the surrounding neighborhoods relaxed at Founders’ Green enjoying grilled hamburgers, cold drinks and desserts as they were entertained by a concert of local musicians that (continued on page 2)

Green Book Authors Maintain Stapleton Ties

The team of four people that was primarily responsible for writing the development plan for Stapleton has maintained its ties to the redevelopment of Denver’s former international airport in a variety of significant roles.

Tom Gougeon is the former executive director of The Stapleton Redevelopment Foundation that was created by Sam Gary and other civic leaders in Denver to create a plan for the redevelopment of the airport. Mr. Gougeon now serves on the board of directors of that Foundation’s modern day reincarnation, The Stapleton Foundation for Sustainable Urban Communities. The Stapleton Foundation works with master developer Forest City and the non-profit Stapleton Development Corporation (SDC) to ensure sustainable development practices, affordable housing, quality schools and other principles of the development plan known as “The Green Book” continue to guide the redevelopment of Stapleton. Mr. Gougeon is a principal in Continuum Partners LLC, the developers of Belmar, the mixed-use “Downtown” that now occupies the former site (continued on page 14)

More Retail Coming to Stapleton Town Center

Final lease negotiations are underway to bring a nationally renowned bagel shop, an Irish Pub and a pizza parlor to the East 29th Avenue Town Center at Stapleton. Robb Brown, regional director of leasing for Forest City Enterprises, said Einstein Bagels is expected to open in late September or early October on 29th Avenue, just east of Quebec Street. Across the street from Einstein Bagels, Clancy’s Pub is preparing to bring to Stapleton a traditional Irish gathering place that will further enliven the East 29th Avenue Town Center. Clancy’s is scheduled to open in the fall, Mr. Brown said.

The choice of restaurants in the Town Center will grow with the addition of Anthony’s Pizza on the ground floor of the south Crescent building across from the fountain. Anthony’s Pizza is scheduled to open in late September, joining Chipotle and Noodles and Company which are already open and providing a variety of dining choices in the East 29th Avenue Town Center.

Recent openings in the East 29th Avenue Town Center include the Cold Stone Creamery and the New (continued on page 2)
Founders’ Day included Matthew Moon, DeVotchKa and Arthur Lee Land. Surrounding the Green were a number of free attractions for children, sponsored by homebuilders and retailers, that included an inflatable jump, face painters, magicians and an assortment of animals from The Urban Farm at Stapleton, which is always a crowd favorite.

The 2004 Founders’ Day celebration was the inaugural event of “Stapleton Under the Stars Summer Series,” a program of concerts and movies that will be held on Founders’ Green in the East 29th Avenue Town Center. (See the calendar above for upcoming events.).

More Retail

Avenues Real Estate Office, both of which are located in the ground floor of the north crescent buildings across from the fountain. An office of Infinity Home Collection, one of Stapleton’s Urban Estate Builders, is also scheduled to open in the Town Center. For more information about retail opportunities at Stapleton, contact Robb Brown at (303) 382-1800.
Infrastructure Adds to a “Green” Stapleton

By Jim Godwin

The development of any parcel of real estate requires a tremendous amount of planning, not merely to comply with local, state, county and federal regulations, but to ensure the success and long-term quality of the development, as well as the enjoyment of the residents and businesses that will locate there for decades to come. While many of the results of that careful attention to planning are clearly visible to the casual observer in the form of quality design and architecture, less evident may be the importance of thoughtful infrastructure planning that for the development of utilities and other necessities that are just as important but not as readily understood and appreciated.

SUSTAINABLE DEVELOPMENT

One such element of the infrastructure planning and development that was particularly important at Stapleton was the planning to manage storm water drainage. Given Stapleton’s commitment to the principles of “sustainable development” that seeks to protect and enhance the quality of our environment for our generation and generations to come, it was our goal to create a storm water management plan that not only met or exceeded all requirements, but added to the quality of life at Stapleton as well.

During many of the 66 years Stapleton operated as an airport, storm water drainage throughout the United States was subject to little regulation. Standards for managing that storm water were created with the passage of the Federal Water Pollution Control Act Amendments of 1972 that were later amended in 1977. More often known as “The Clean Water Act,” this legislation and the state and local programs that implemented those standards were designed to control the release of pollutants into the waters of our nation. Very few people are aware of the water quality impacts that stormwater has on our rivers, streams or lakes. Stormwater runoff quality can have significant impacts to aquatic habitat and ecosystems. Studies have shown that urban residential runoff contain significant quantities of the same types of constituents that are found in the discharges from wastewater and industrial discharges.

At Stapleton, we had essentially two choices to meet the challenges of handling storm water drainage. The conventional way would be to send that water through underground concrete culverts, much like the system that carried Westerly Creek under the east-west runways during Stapleton’s operation as an airport. While that approach would have enabled us to meet the requirements of the applicable hydrology/hydraulic criteria, it would have done little to bring added value that would enhance the quality of life at Stapleton and the surrounding region.

One such element of the infrastructure planning that for the development of utilities and other necessities that are just as important but not as readily understood and appreciated.

NATURAL SYSTEMS

As an alternative, Forest City Stapleton, Inc. worked with The Park Creek Metropolitan District, the U.S. Environmental Protection Agency, the City and County of Denver and our consultants from URS/Matrix Design Group and EDAW to design an enhanced storm water management system at Stapleton that sends runoff through carefully designed “constructed wetlands” created within our open space. That system employs what are commonly called “best management practices” enabling us to ensure that the water flowing off Stapleton via Westerly Creek and Sand Creek as it makes its way to the Platte River meets all required water quality guidelines. At the same time, that storm water management enhances the quality of the natural areas in Greenway Park and Westerly Creek, creating additional wildlife habitat and wonderful options for recreation.

The pace at which the benefits of this natural form of storm water management become evident will be determined not just by our construction schedules, but by the cooperation of Mother Nature as well. Some areas, such as those along Westerly Creek, are already beginning to turn green, while others such as the water quality control pond in Greenway Park along 26th Avenue are taking a little longer. Given a little more time, the Greenway Park water quality pond has the potential to become one of Stapleton’s open space “jewels.” The “StapleStone” structure (composed of roughly cut blocks of former runway concrete) in the Greenway Park water quality pond is part of a system that not only allows sediment in the water to settle before that water is sent downstream, it also provides a wonderful place to relax a sunrise or sunset as one enjoys the open space at Stapleton.

The technical aspects of thoughtful and imaginative planning for infrastructure may not be readily apparent to everyone, but the results will benefit generations of residents and businesses at Stapleton for many years to come.

Jim Godwin is Vice President–Engineering for Forest City Stapleton, Inc.
Barbara Cooper

Barbara Jean Cooper has been principal for the past year of the Hallett Science & Technology Academy located at 29th Avenue and Jasmine Street in Park Hill. Ms. Cooper is a native of Chicago and a graduate of the Chicago Public Schools. She attended Western Illinois University where she received a bachelor's degree in education. She furthered her studies in education at the University of Colorado at Denver where she received a master's degree in administration, supervision and curriculum. Ms. Cooper is currently pursuing a doctorate in urban education at UCD.

Ms. Cooper has pursued a career in education at the elementary and college level for 13 years in Illinois and Colorado. She will begin her sixth year as a principal in Denver Public Schools in the fall. Ms. Cooper was also a member of the team that developed the new “pay-for-performance” plan for DPS teachers that was completed earlier this year. Called ProComp, the plan is one of the most advanced efforts in the United States to base teacher pay on the improved achievement of their students.

Ms. Cooper is married to Walter Cooper, Sr. and is the mother of two children, Walter, 12, and Timera, 7, who both attend Denver Public Schools.

Some of her recent accomplishments: Community Award recipient for Alpha Phi Alpha, Fraternity Inc.; founder of the Denver Public Schools. She attended the Chicago Public Schools. She attended Western Illinois University for a career in education. She furthered her studies in education at the University of Colorado at Denver where she received a master's degree in education. Summer’s here! Healthy living is an integral part of sustainability at Stapleton. It starts with the design of the community that makes it easy and convenient to walk, run, bike, and be active. Stapleton is a great community where people can enjoy tree-lined streets, sidewalks, and pathways that connect homes, offices, shops, schools and parks.

There are even more ways to be active through weekly programs and special events. Stapleton Strollers, swimming lessons at Aviator Park, the Stapleton Charity Chase, Bike to Work Day, and the Stapleton Stampede in September all provide great opportunities to go outside, enjoy nature, and be active.

Healthy living at Stapleton is comprehensive. The exercise programs and special events listed above are just some of the elements of healthy living at Stapleton. This area of sustainability also includes alternative transportation options, health-oriented programs and more. In future editions of The Front Porch, watch for more information on healthy living activities.

### NREL RENEWABLE ENERGY BUS

The Renewable Energy & Efficiency Education on Wheels Bus (RnE2EW) visited Westerly Creek Elementary and The Odyssey School on May 14th. The bus is a teacher resource center, outfitted with electronics, displays, and workstations. RnE2EW is designed around renewable energy & efficiency themes while the trailer is a display of actual technology and power generation.

The curriculum on RnE2EW includes major renewable energy and energy efficiency themes researched and developed at the National Renewable Energy Laboratory:

- **Solar** (light/electromagnetic radiation, electricity, circuitry, conduction/convection, efficiency, energy resources/transformations, subatomic particles, thermodynamics, seasons, and trigonometry);
- **Biomass** (organic chemistry, genetics, distillation, acid/base reactions, agriculture, chemical/carbon cycles, climatology, plants, and energy resources/transformations);
- **Hydrogen** (fuel cells, atomic structure, chemical reactions, electricity, circuitry, energy resources, electrolysis, electrolytes, thermodynamics, efficiency, oxidation, catalysts, and energy resources/transformations);
- **Geothermal** (volcanology, thermodynamics, energy resources/transformations, geology, tectonic plates, heat expansion, vaporization, and geysers);
- **Wind** (simple machines, weather/climatology, aerodynamics, leverage, mechanics, atmospheric pressure, and energy resources/transformations);
- **Energy Efficiency and Awareness** (Nonrenewable and renewable energy sources, insulators, ecology, economics, distributed energy, world energy politics, and energy resources/transformations).

Melissa Knott is the director of sustainability, Forest City Stapleton, Inc.

### Wow Mom! There’s a Monkey in My Dental Chair

A Wild Smile is not just any children’s dental practice. Step inside and you enter a tropical jungle. Sign in, and you go on safari. A Wild Smile, newly opened at the Stapleton Town Center, turns a child’s visit to the dentist into a fun-filled adventure rather than an experience to be dreaded.

A Wild Smile is the brainchild of Jesse Wirkhoff, DDS, and his wife Elana. From the time he began practicing pediatric dentistry, Dr. Jesse, as he is called, wanted his young patients to enjoy the experience of a trip to the dentist, not fear it.

“I use mental imagery to reframe what kids are about to experience so they will feel totally comfortable,” says Dr. Jesse, who modeled A Wild Smile after his established pediatric practice in Arvada, called Pedodontics. “For example, the high-speed drill makes a sound that I call ‘Mr. or Mrs. Whistle.’ I might tell a child that I’m using a magical paintbrush to paint his or her favorite action hero on a tooth.” In so doing, Dr. Jesse gains a rapport with his patients that simply eludes many dentists who treat children.

Elana Wirkhoff, Dr. Jesse’s architect wife, adds a more tangible element to the child-friendly practice. The interior of A Wild Smile is an architecturally crafted indoor jungle, complete with the overspreading branches of a leafy tree and stuffed animals hanging from the branches. For the child, a visit to A Wild Smile is going on safari, not a trip to the dentist.

When they check in for the first visit, children and their parents register at the safari sign-in station, and the child receives a safari passport book. On their safari, children (and even parents) will visit various stations. At Jaya Junction, parents can get a cup of coffee. At Smile with Lyfe, kids get their picture (x-rays) taken with Lyfe the Gorilla. At the Education Station, kids learn about good dental hygiene, and at the Watering Hole, they learn and practice the proper way to brush their teeth. At each station they get their passports stamped, until they complete their journey.

Using psychology, a genuine love of kids and visual imagery, Dr. Jesse aims to completely change the way children perceive a visit to the dentist. At his practice in Arvada, he has actually had some parents call to ask if they can hold their child’s birthday party in his office over a weekend, at the child’s request.

A Wild Smile is located on the corner of Westerly Creek Elementary and The Odyssey School on May 14. The bus is a teacher resource center, outfitted with electronics, displays, and workstations. RnE2EW is designed around renewable energy & efficiency themes while the trailer is a display of actual technology and power generation.

The curriculum on RnE2EW includes major renewable energy and energy efficiency themes researched and developed at the National Renewable Energy Laboratory:

Denver Botanic Gardens — The Art of Ur

Since 1951, Denver’s Botanic Gardens has been widely renowned for its delightful array of exhibits and activities that enhance the quality of life for people of all ages in metropolitan Denver and communities throughout the Rocky Mountain region. Located at 1005 York Street, just minutes west of Stapleton, Denver Botanic Gardens offers the following attractions:

**FREE DAY AT DENVER BOTANIC GARDENS**

**Monday, August 16**

Performance by the Jumpin’ Jive Cats 5 - 6 p.m. Hannah Kahn Dance Troop from 6:30 - 8 p.m.

**CHAPUNGU SCULPTURE EXHIBIT**

May 31, 2004-October 31, 2004

Denver Botanic Gardens presents a once-in-a-lifetime exhibition of African sculptures never before seen in the Rocky Mountain region, “Chapungu: Custom and Legend, A Culture in Stone.” This extraordinary collection of contemporary Zimbabwe stone sculpture is the highly expressive artwork of the Shona people of Zimbabwe, Africa. Over 80 contemporary African sculptures that celebrate the connection all humanity shares with nature, culture and art will be displayed. The Chapungu exhibit is presented by Denver Botanic Gardens in association with Chapungu Sculpture Park. Sculptures range in height from 3 feet to 11 feet and weigh between 600 pounds and 6,000 pounds. Stone carving workshops, African music, dance and theatre presentations, cultural gardening programs, sculpture tours and more complement the exhibit. Check out www.chapungu-denver.org or call 720-865-3700 for more information.

**2004 FITNESS WALKS AND TAI CHI PRESENTED BY AARP**

Every Tuesday morning from June 1st through August 31st, 7 - 9 a.m. Enjoy free Fitness Walks and morning Tai Chi sessions; a great chance to enjoy the quiet splendor of the Gardens in its early morning quiet splendor. Healthy snacks will be provided. There will be a one-time $3.00 special event fee for all attendees during the Chapungu exhibit.
On Saturday, August 28th, runners will take to the streets of Stapleton for the 1st annual Stapleton Stampede, benefiting the Metro Denver Realtor Foundation. A 15K and 5K Run and Family Walk will offer runners and walkers a chance to see the new neighborhood while raising money for parks, open space, and schools in the Stapleton community. The start and finish of the race will be at Founders’ Green, located in the heart of the East 29th Avenue Town Center.

For more information on registration and volunteer opportunities, visit www.StapletonDenver.com.

City Park Jazz Festival

CONCERT SERIES FOR SUMMER 2004
What do you get when you mix hot jazz warm summer evenings, and Denver’s premier park? City Park Jazz’s 15th season, featuring concerts by top local artists. City Park Jazz is a non-profit organization bringing Free Concerts to City Park every Sunday evening all summer long. Concerts begin at 7:00pm and usually last until 8:30pm. The City Park jazz concerts continue a tradition of concerts in the park dating from the early 1900’s. Ferril Lake provides the backdrop as jazz enthusiasts of all ages – from toddlers to grandparents – kick back on the grass near City Park bandstand and sample Denver’s finest musicians. The summer concert series offers something for everyone, from devotees of traditional jazz to fans of funk, Latin rhythms and the big band sound. Picnics are welcome, or concert-goers can purchase food and drinks at nearby City Park Pavilion. Those who want to enjoy the music drifting across the lake can rent paddleboats.

For more information on the 2004 City Park Jazz Concert Series, call the hotline at 303-744-1004 or visit www.cityparkjazz.org.

Stapleton Stampede Aug. 28
On Saturday, August 28th, runners will take to the streets of Stapleton for the 1st annual Stapleton Stampede, benefiting the Metro Denver Realtor Foundation. A 15K and 5K Run and Family Walk will offer runners and walkers a chance to see the new neighborhood while raising money for parks, open space, and schools in the Stapleton community. HOME EQUITY AND PERSONAL LOANS AND LINES OF CREDIT
**International House of Pancakes**

“Come hungry; leave happy.” That’s the philosophy of Ted Cunningham, manager of the International House of Pancakes in the Quebec Square Regional Retail Center at Stapleton. The Milwaukee native manages a staff of 45 people with experience he has gained in working his entire career in the restaurant business.

While Ted’s restaurant draws many of its customers from the hotels located across the street on Quebec, he also notes that he has a number of others who live in the area or drop in while doing business at Quebec Square. Open 6 a.m. to 10 p.m. Sundays through Thursdays and 6 a.m. to Midnight on Fridays and Saturdays, “IHOP” provides the kind of great food and friendly service that does indeed make even its hungriest customers “leave happy.” Call (303) 399-4646 for more information.

**Cold Stone Creamery**

“Every day is a great day for ice cream!” Who can argue with that philosophy? Certainly no one who stops in at Dean and Tonja Gerondale’s Cold Stone Creamery in the East 29th Avenue Town Center at Stapleton! Located on the ground floor of the north crescent building across from the fountain, Cold Stone Creamery is a great place to stop in for a cool treat as summer temperatures begin to soar.

But wait, it is not just the great ice cream that is bringing them through the doors at Cold Stone Creamery! Manager Mike Berger says he hires employees who can sing. The next time you stop in, give them an audition! Cold Stone Creamery is open Sundays through Thursdays from 11 a.m. to 10 p.m. and Fridays and Saturdays from 11 a.m. to 11 p.m.

**US Bank**

Shane Mahoney, manager of the branch of US Bank located in the East 29th Avenue Town Center King Soopers, sums up his bank’s appeal in one word: “convenience.” Open seven days a week, Mondays through Fridays from 9 a.m. to 7 p.m., Saturdays 9 a.m. to 4 p.m., and Sundays 11 a.m. to 4 p.m., US Bank is readily available to everyone doing their grocery shopping or stopping by to conduct bank business. The staff of in-store bankers headed up by Shane and his assistant Justin Dicken includes bilingual banker Alvaro Aiquipa who is available to help Spanish-speaking customers.

A graduate of the University of Colorado who holds a Masters from Regis University, Shane enjoys meeting the new customers who come to his bank as the development at Stapleton progresses. For more information, call (720) 941-4900.
Rosalie Harlan, the new manager of the Subway in Quebec Square, offers a wide variety of healthful sandwiches.

Rosalie says people are willing to wait a little longer for that freshness, but nevertheless, her staff manages to serve everyone so quickly and pleasantly that they are building up a dedicated clientele that keeps coming back for more.

Rosalie says a large percentage of her customers come from the United Airlines Flight Training Center that is located across 35th Avenue. Her store is open from 9 a.m. to 11 p.m. Monday through Sunday, hours she says are convenient for people who work a variety of shifts and need a fresh meal fast.

The AT&T Wireless store in Quebec Square has so many cell phones from which to choose it must surely have a model, style and color to suit any need. Sales Manager Cindy Northrop and Communications Specialists such as Alejandra Caraveo are prepared to highlight each phone’s features and programs.

Many of the customers at the Quebec Square store are new residents of Stapleton, which Cindy calls a “great community.” The AT&T Wireless store in Quebec Square is open Mondays through Fridays from 9 a.m. to 8 p.m., Saturdays from 9 a.m. to 7 p.m., and Sundays from 11 a.m. to 6 p.m. Call (303) 322-1810 for more information. Bilingual assistance is available.

New residents of Stapleton or homeowners in the surrounding neighborhoods have no need to worry when they are addressing their home theatre or satellite television system needs - help is available at the RadioShack in Quebec Square.

RadioShack manager Ben Chandler’s store is open Mondays through Saturdays from 9 a.m. to 9 p.m. and Sundays from 11 a.m. to 6 p.m. to provide each customer with much of their electronic needs. Ben says his staff of five employees is among “the best trained anywhere” and ready to help customers with needs that range from radios to batteries, from cell phones to televisions and what Ben calls “the real cool things” such as the always-popular remote controlled cars. RadioShack’s location just across Quebec from the hotels makes it a popular destination for guests and employees who suddenly find themselves in need of any one of the many electronic products readily available at Ben Chandler’s store. Call (303) 321-5079 for more information.

Justin Ross, Owner, is excited about the opportunity to offer Mortgage Loan Services to the residents of Stapleton and the Metro Denver area. With twelve years of mortgage experience, Stapleton Mortgage was established in September of 2002. The Ross’s were one of the 1st families to move to Stapleton in June 2002. Justin’s older daughter Jericka will be entering the 6th grade this fall and he and his wife Marissa are expecting their 1st child in September. Justin and Marissa are quite anxious to experience the growth along the Stapleton corridor and look forward to serving your mortgage loan needs. Stapleton Mortgage may be reached at 303-810-0782, or email jusross@stapletonmortgage.net

Infinity Model Homes Now Open at Stapleton

Based from the $400s and ranging from 2200 to 3200 square feet, Infinity is offering four exciting “Court Home” floor plans on a number of special Stapleton homesites. Expansive great halls, main floor living, and indoor/outdoor interaction are among the homes’ highlights, creating perfect living opportunities for couples and families alike.

Infinity Retail Studio set for June 19th Grand Opening!

Experience the “birth of cool” at Infinity’s state-of-the-art information center located in the 29th Avenue Town Center. Visit today to learn more about one of Denver’s most decorated homebuilders while discovering what makes Infinity’s Stapleton offerings so appealing.

www.infinityhomecollection.com

TO ADVERTISE IN THE FRONT PORCH
Call Julie Picha at 303-382-1800
By Charlie Nicola

**NEW RESIDENTIAL NEIGHBORHOODS**

Filing 6 (south of the East-West Linear Greenway) infrastructure work including utilities, roadways and landscaping is nearing completion. Residents have already moved in on Beeler St. in this filing. District contractors have been working closely with Colorado Studios, Bladium Sport Complex and The Police Academy to maintain services and access while major construction proceeds around their businesses.

Work on Fillings 11 and 12, which are the first residential neighborhoods east of Westerly Creek, started in May. Homebuilders are scheduled to acquire properties on the first lots in Filing 11 by September.

**BRIDGES**

The new Central Park bridges (2 – two-lane bridges north and southbound) across the East West Greenway are scheduled for opening in early July, providing significant new access between Montview Boulevard on the south end and, ultimately, Martin Luther King Boulevard on the north.

The concrete deck is now being poured for the Quebec Street bridge/overpass project at I-270 which will eventually serve as the major entry to the Northfield Retail Center that will open north of I-70 in the fall of 2005 anchored by Bass Pro and a 16-screen movie theater complex.

All of Stapleton’s bridges will have high attention to detail, including stone facades on abutments, monuments and special lighting. For example, the lighting fixtures specified under the MLK bridges over Westerly Creek were selected to provide only minimal impact on the wildlife expected to pass over Westerly Creek. Those bridges are scheduled to open this fall.

**INFRASTRUCTURE**

Infrastructure work supporting the new Denver School of Science and Technology and the Johnson and Wales site and other developments at Stapleton continues. This includes construction by PCMD contractors on the reclaimed water delivery system for Denver Water starting this week. The work extends from Quebec to Yosemite Street (or CPB), requiring detours and lane closures already in place on Montview. The 36” diameter pipeline is part of the larger system Denver Water is installing to recycle water for irrigating major pathways throughout Denver, including Stapleton.

Major underground sanitary work to accommodate the increasing development at Stapleton was completed last month across Sand Creek. Construction is also proceeding along Sand Creek in the vicinity of its confluence with Westerly Creek to allow construction activities in the area and for the ultimate new alignment of the trail, outlook and other amenities planned there. Detours in the Sand Creek Trail in the vicinity of Westerly Creek can be expected over the next several months.

**CENTRAL PARK**

The plans for the major urban park (Central Park) east of the former FAA Control Tower were submitted to the City for final approval. Grading and utility work is expected to begin in August on this planned 3 year project to include phased construction of landscaping, sledding hills, a central promenade, concession structures, playground and athletic fields.

The eastern portion of Greenway Park was substantially opened with the Charity Race events June 5th. Portions of Westerly Creek are expected to be accessible later this year as seed and plantings in the area become more established. Other major parkways are under construction at the gateway to Stapleton at MLK and Quebec where medians along MLK and Quebec are being constructed. Sod will be installed in September due to drought restrictions.

**NORTH OF I-70**

Earthwork continues at the Northfield Retail site north of I-70 where about half of the expected one million cubic yards of dirt has been moved. Embankment is also being placed east of the retail center for the new Nobel/Sysco office and distribution site where the company is investing over $40 million to relocate and expand its operations.

Construction contracts for work in progress or completed at Stapleton total approximately $220 million to date. An additional $46 million in contracts is expected to be committed in the next year.

Charlie Nicola is senior vice president-construction for Forest City Stapleton, Inc.

**Hallett School (continued from page 4)**

content area. Each module is designed for 25-40 class sessions. In T.R.A.C.S., students learn basic science concepts and inquiry skills recommended by the National Science Education Standards and the American Association for the Advancement of Science. T.R.A.C.S. supplies teachers with comprehensive “how-to handbooks” that describe the processes and outcomes of each module and teaching strategies. T.R.A.C.S. was developed in Colorado.

The close proximity to the developers could be an additional advantage to implementing T.R.A.C.S., according to the University of Pittsburgh’s Institute for Learning, a consultant for Denver Public Schools on a broad range of curriculum issues.

The Hallett staff plans to infuse science into the curriculum. Science subjects will be taught in literacy work. The school uses the district’s Everyday Math program, which will include science related problems in math exercises. The language of science and the curiosity it breeds will become part of all coursework.

In 2003 Hallett was rated low with significant improvement based on results of the Colorado Student Assessment Program. Thirty-three percent of Hallett’s students passed the CSAP reading test and 24 percent passed the writing.

In addition to integrating science into the curriculum, other goals for the 2004/05 school year:

- Analyze student performance data more precisely and use it to tailor instruction to individual needs.
- Begin the year with each teacher examining a compilation of each student’s work.
- Repeat that student record examination two more times in the year to better track progress and needs.
- Hire a full-time science teacher.
- Institute the well-regarded Time to Teach discipline program.

- More staff development on classroom management.
- Create a more supportive environment to reduce teacher turnover.
- More staff development on teaching strategies for math and science.
- Hire a new literacy coach who will enhance teachers’ knowledge on literacy instruction.
- Improve the school’s rating from “low” to “average.”
- Increase enrollment of children who live in the school’s neighborhood.
- Increase parent involvement through home visits, events and parent education.
- Brian Weber is Vice Pres.

Is Your Pet Protected?
Mosquito bites are more than a nuisance; they can threaten your pet’s life. A bite can transmit a very serious illness called “Heartworm Disease”. Once considered a parasite of southern climates, the heartworm (*Dirofilaria immitis*) is now recognized as a major, global pest affecting dogs, wolves, coyotes, and foxes. Prevention of Heartworm Disease should be a part of your pet’s routine health care.

*Dirofilaria immitis* in their immature, microscopic stage are carried by mosquitoes. They are injected into your pet while the mosquito is feeding. The immature worms migrate through the body, eventually reaching heart, lungs, and connecting blood vessels. In approximately six months, they grow to become adults as long as 14 inches in length. When they reproduce, their tiny offspring, called microfilaria, circulate in the bloodstream. At this point they can spread to another animal by a mosquito bite.

Prevention is much easier than treatment. All dogs should be routinely tested for Heartworm Disease. Testing is typically done on an annual basis, although some dogs may require more frequent testing. Dogs with a negative heartworm test should be placed on a preventative medication. It is important to understand that the preventative should never be given without performing the blood test. Placing any animal on preventative that is already infected with heartworms can result in a severe reaction and the death of the animal.

Several types of preventative medication are available including tablets given on a daily basis, monthly tablets, monthly spot-on topical solution, and a 6 month injectable solution. Animals should be on preventative medication whenever mosquitoes are present.

Many veterinarians recommend and many owners use a year-round prevention program to guard against the occasional mosquito flying about in Colorado’s relatively mild winters. If your pet has already had his annual wellness exam, call to schedule a heartworm check. If he’s due for an annual wellness exam be sure to include a heartworm check in the visit.

**Front Porch Flower Talk**

by Michele Stefanon
Amore Fiori Flowers and Gifts

*Flower + Plants = Workplace Productivity*

I recently read an interesting article on the effects of flowers and plants in the workplace and thought I would share some of the findings. A study was conducted by the Society of American Florists and a research team from Texas A&M University. They wanted to learn how flowers and plants in the workplace impact productivity and problem solving. After eight months of working closely with the research team, SAF shared the exciting results of this groundbreaking study: Problem-solving skills, idea generation and creative performance improve substantially in workplace environments that include flowers and plants.

Specifically, both men and women who work in environments with flowers and plants demonstrate more innovative thinking as compared to environments with sculpture or no decorative objects. Men who participated in the study generated 30 percent more ideas when working in environments with flowers and plants than ones without. While men generate a greater abundance of ideas, the research shows that women generate more creative, flexible solutions to problems in productive workplace environments with flowers and plants.

As a result, flowers and plants prove to be beneficial additions to any work environment.

“The research shows that flowers and plants can be important in the most meaningful way to businesses in the modern economy,” says Roger Ulrich, Ph.D., behavioral scientist and the study’s lead researcher. “Productivity, in the form of innovation and creative problem solving, can mean the difference between mild and great success.”

Help your business be a great success and incorporate flowers or plants into your workplace today! Stop by and visit our store for more information! Michele Stefanon’s flower shop, Amore Fiori Flowers and Gifts, is located in the East 29th Avenue Town Center. For more information call 303-333-3848.

Stapleton United Neighbors  
S.U.N. Goals for 2004-05  

Continuing the traditions of Denver’s classic neighborhoods, Stapleton’s “new urbanism” philosophy blends old-fashioned values with the contemporary needs of 21st century families. We are grateful for the years of planning and hard work that preceded the realization of the Stapleton dream. Today, as individuals and families begin to live out the Stapleton vision, residents have come together to help support the infrastructure of the dream-forging important relationships for the next generation of community living. On porches, in the parks and on the playground, Stapleton neighbors have been communicating about their good fortune and the emerging talents of our community. In achieving these goals, our community has established the following goals for the coming year:

- To create a forum for neighborhood discussion and collaboration;
- To develop a reliable communication system among the residents in and around Stapleton;
- To build a neighborhood watch organization that will focus on public safety in coordination with local police;
- To work with Denver city government and Forest City to manage traffic and transportation concerns in our neighborhood; and
- To assist local schools and other community organizations to increase and enrich educational opportunities.

In working toward these goals, we hope to harness the interests and talents of our community. In achieving these goals, our community grows stronger. For more information or to get involved, please feel free to email us at Stapletonneighbors@msn.com

Letters to the Editor

Editor:

After recently reading the latest issue of Front Porch I found it disturbing that one of the most important factors that made us look into homes at Stapleton wasn’t mentioned: The Light Rail. As you may or may not know this issue is going to be on the November ballot under the title FasTracks. This is RTD’s 12-year comprehensive transportation plan that includes 119 miles of light rail around the city, some of it going past Stapleton to DIA and to downtown. I would think this is something we as residents would like to vote on to improve the value of our homes and the transportation available, especially environmentally-friendly types.

Thank You. A Future Resident, Jacob White

EDITOR’S NOTE: The August edition of the Front Porch will carry an article on the FasTracks proposal.

Editor:

We would like to THANK the community of Stapleton for your support of the Charity Chase 2004 that was held at Greenway Park on Saturday, June 5th. You opened up your hearts, your wallets, and your streets to help make this event a real success! Thanks to the Stapleton merchants for your sponsorship, and to those who donated food products, prizes for the winners and items for the drawing. The food was fantastic, the weather was great, the park was beautiful, the volunteers were incredible and the Stapleton community made us feel welcome. See you next year!! Kathy Anderson, Nancy Meisheid, Charity Chase Co-Chairs

Views Of S.U.N. Directors-at-Large  
What is Your Goal for S.U.N.?

BILL FULTON – PRESIDENT  
(Educator, Director, Facing History Project of The Public Education Business Coalition)

My goal for SUN is to provide a familiar, inclusive space for the residents in and around Stapleton to recognize each other as a community. This will largely consist of creating strong norms of cooperation, reliable communication networks (e.g. block captains and on-line formats), and regular public forums that allow residents to raise, discuss, and address issues in a way that strengthens the overall community—rather than pitting one faction against another.

ELIZABETH GARNER - VICE PRESIDENT  
(Economist – Colorado State University)

As a SUN director, I want to work on fostering communication and collaboration between SUN and other entities, particularly in the areas of quality public education and affordable housing.

GREGORY A. DIGGS – SECRETARY  
(Senior Research Associate, National Research Center)

I'd like to help achieve the vision of “new urbanism” and to create and sustain a diverse and dynamic environment for Stapleton residents.

BRYAN PENNY – TREASURER  
(International Controller for Western Union)

The goal I have for SUN is very basic. To make Stapleton a better place to live. The things that have attracted many people to Stapleton have been very obvious but I see the role of SUN to work with everyone (HOA, Forest City, Builders, Businesses, Resident and surrounding communities) to make the vision of Stapleton a reality. With the hard work of everyone involved, it can and will happen.

BERNARD DOUTHIT  
(Director of Client Management, Fortrust Solutions)

I would like to help local schools achieve educational excellence and I will work to manage growth in order to maintain a superior neighborhood.

MIKE KING  
(Transactional Attorney, Brownstein Hyatt & Farber, P.C.)
I’d like to help facilitate a smooth transition from nascent development to a mature community complete with its own neighborhood culture, traditions and services, with emphasis on maximizing communication and cooperation with city government and local groups to meet essential neighborhood needs (i.e., establishment of a community-based partnership with police to address security and traffic issues).

JENNIFER SONG KOEPPE  
(Architect)
I would like SUN to devote its attention to anything that affects our built environment/community, planning and urban design issues (master planning), sustainability and green building practices.

JASON LONGSDORF  
(Transportation Planner for the City of Denver)
I want to work on creating multiple transportation options within the neighborhood and out to the rest of the city including safe sidewalks, convenient transit, well-marked bike routes, high quality off-street trails and reasonable traffic speeds.

MELISSA MCQUEEN  
(Technology Director/Instructor - Montclair Academy)
As a SUN director I want to help keep open lines of communication among all members of our community and also help Stapleton become the great neighborhood we all envisioned when we moved here.

CAROLINE WILTEN  
(Background in Marketing Communications, Advertising and Project Management; currently a stay-at-home mom)
My goal for SUN is to help develop open communication between neighbors, developers, builders and the city.

Agency Gives Full-Time Parents Part-Time Work

Stay-at-home moms and dads looking for an alternative to full-time employment have found their answer in “10 til 2, LLC,” a professional employment agency specializing in placing college-educated parents in part-time permanent positions.

Stapleton resident Heidi Crum, one of the founding partners and a vice president of finance for “10 til 2,” said companies seeking professional expertise in a part-time capacity have increasingly turned to “10 til 2” for qualified employees from its growing pool of exceptional applicants. Since its formation in November 2003, “10 til 2” has placed qualified adults in part-time positions with hospitality, legal, construction, publishing, and non-profit businesses including start-ups and major corporations.

Hyatt Regency Denver’s Director of Sales, Mark Darrington, currently employing two mothers placed with the Hyatt by “10 til 2,” says, “Since 2001, we’ve been running a lean staff because of the economy, but still need additional employees during the peak time of day. “10 til 2” allows the sales office to increase its coverage with skilled employees while cutting out the costs of benefits and full-time salaries.”

“10 til 2,” a Denver-based Limited Liability Company, was founded by four local women who sought to use their professional skills while their children were in school. “Being a parent is the most rewarding job anyone can have,” said Jill Ater, one of “10 til 2’s” four founders. However, when my kids went to school, I wanted to do more with my time and life, and use my college education in a professional environment.

After talking with some friends, we realized we weren’t alone, that there are many others who also want to do something more with those few free hours while our children are in school.”

Sharon Bailey, a Parker, Colorado resident with three boys who has been employed in a Parker-based construction company, said, “My new job gets me out of the house and raises my self esteem. I still have the freedom to be a mom, but now I have the best of both worlds.”

“10 til 2” has had no problem finding experienced individuals to meet the demand of businesses, since 70% of stay-at-home parents are mothers. At this time, “10 til 2” primarily places moms, but also places stay-at-home dads as well as other adults who want quality part-time work.

For more information on “10 til 2,” visit www.tentiltwo.com or call 303-909-3868.

Green Book Authors (continued from page 1)

of the Villa Italia Shopping center in Lakewood, Colorado.

Jim Chrisman moved from writing the development plan for Stapleton to directing its implementation. Mr. Chrisman now oversees work at Stapleton as the senior vice-president of development for Stapleton’s master developer, Forest City Stapleton, Inc. In the years between those two positions, Mr. Chrisman worked for SDC which was created by an appraisal approved by the Federal Aviation Administration.

Upon leaving the Stapleton Redevelopment Foundation and SDC, Alan Brown returned to his architectural practice, Alan Eban Brown, AIA LLC, which he established in 1989-90 after he completed his work on the design of the Denver International Airport terminal complex. His recent Stapleton projects include the design for the original Odyssey School (DPS Charter) at Stapleton, the original Stapleton Visitor Center, and design services for the new SDC Services Corp. offices.

Beth Conover, the fourth member of the Stapleton Redevelopment Foundation team, also worked for SDC before developing her own consulting firm. Following Mayor John Hickenlooper’s election in June 2003, the mayor tapped Ms. Conover to serve as one of his senior aides. In her new role at City Hall, Ms. Conover continues to play a significant role in a variety of issues related to the redevelopment of Stapleton.

Civic leaders in Denver and Aurora who played key roles in the early days of the Stapleton process also continue their efforts today. In addition to Mr. Gary and Mr. Gougeon, others still active in the Stapleton Foundation include Stapleton Foundation board members Harry T. Lewis, Jr., Reverend Paul Martin, former Denver City Councilwoman Happy Hayes, Karen Saliman, Del Hock, Hubert Farbes, Jr. and Foundation CEO Beverly Haddon. Other members of the metropolitan area community involved in the early planning for Stapleton continue to serve on the Board of the Stapleton Development Corporation and its Citizens Advisory Board.

“The hallmark of the expansive public process that laid the foundation for The Stapleton Development Plan has always been the unbelievable commitment of time and effort made by so many of the citizens of our community,” Mr. Chrisman said. “Without the energy and enthusiasm of these civic leaders, Stapleton would not be receiving the national and international acclaim it has earned today as one of the nation’s most successful new urban communities.”

Commander O’Neill Retires

Commander Mike O’Neill has retired after serving 37 years with the Denver Police Department. Shown here with District Two Community Resource officer Technician Michael Rappe (left) and Technician Reyes Trujillo (right), Commander O’Neill was highly regarded by the citizens throughout the City for his accessibility and involvement in the community.

Denver Releases New Summer Youth Guide

By Doug Linkhart

With summer here, and the annual question “What will the kids do?” in the air, City Councilman At-Large Doug Linkhart has announced the release of the 2004 “Denver Youth Activities Guide.” The guide, sponsored by Linkhart, State Senator Paula Sanford, and DPS Board Member Kevin Patterson, is full of programs and opportunities for school-age children to learn, work, connect or just have some organized fun in the summer months of 2004.

The bilingual guide lists 123 locations and organizations throughout the city, ranging from summer sports camps in hockey, tennis or lacrosse; to jobs in community-based service programs; from classes in reading or technology to programs in art appreciation or improvisational comedy. The guide is conveniently organized into four categories: education, employment, recreation and social activities; and features a map indicating the location of each.

“There are so many great opportunities for kids in summer here in Denver,” said Councilman Linkhart. “Parents can help their kids explore what interests them, and use the summer lull as a time for productive growth, as well as fun. With so many programs low-cost or free, no child has to be left out.”

More than 90,000 copies of the Guide are being distributed through Denver Public Schools, Denver Public Library branches, city recreation centers, and Safeway Supermarkets. The Guide is also accessible on-line at www.douglinkhart.org and can be referenced by phone through the new 211 social services information number.

Corporate sponsors for the 2004 Denver Youth Activities Guide are First Data Corporation, Mile High United Way, Forest City Stapleton, Frontier Airlines, 1st Bank, Centura/St Anthony’s Hospital, Safeway, American International, Family Insurance and JPS International.

For more information, contact Councilman Linkhart’s office, 720-865-8000.
Meet Stapleton's Neighborhood Doctor, Kristine Leathery, MD. Dr. Leathery is board certified in family medicine. She and her partners at Exempla Family Medicine at Stapleton recently opened their new office conveniently located in the Stapleton Plaza Office Building.
